ABSTRACT

Statistics concerning American Indian education in 1971 are published annually by the Bureau of Indian Affairs (BIA) and are available the fall following the close of the school term which they cover. The BIA had direct responsibility for 56,786 children enrolled in Federal schools and housed in Federal dormitories, and partial financial responsibility for approximately 2/3 of those children enrolled in public schools. The 1971 fiscal year statistics concerning American Indian education, presented in tabular form, cover the following areas: school census by area and agency; enrollment and average daily attendance by area, boarding schools, day schools, hospital schools; completion and graduates by area; enrollment by grade and area, degree of Indian blood, and tribe; school construction summary; activities under the Elementary and Secondary Education Act; and summer program enrollment figures. Also included is a statistical fact sheet on schools operated by the BIA for the 1971 fiscal year. Background information concerning the Federal government's involvement in American Indian education is given. A related document is ED 046 569. (FF)

#### EDUCATION OF INDIAN CHILDREN IN 1971

Indian children attend public, Federal, private, and mission schools. In fiscal year 1971 there were 190,174 Indian students, age 5 to 18 years, inclusive, enrolled in these schools in the United States.

Education of Indian children residing in the States of California, Idaho, Michigan, Minnesota, Nebraska, Oregon, Texas, Washington, and Wisconsin is the responsibility of the state concerned.

In 1971 more than half (63.3 percent) of all Indian children of school age (5 - 18) attended public schools. Of those enrolled in school, 68.8 percent attended public schools, 25.7 percent attended Federal schools, and 5.5 percent attended mission and other schools.

For more than three centuries Indian education in the United States was largely under the direction of missionaries. As early as 1568 the Jesuit Fathers organized a school at Havana, Cuba, for Indian children from Florida. This was the first school attended by Indian children who lived within the United States.

Many of the treaties between the United States and Indian tribes provided for the establishment of schools for Indian children. Congress has also provided schools for Indian children where other educational facilities were not available. In 1842, there were 37 Indian schools in operation and by 1881 the number had increased to 106. In 1971 the Bureau of Indian Affairs operated 200 schools with an enrollment of 52,591 Indian children, and 19 dormitories for 4,195 children attending public schools.

The primary objective of Federal schools operated for Indian children living on Indian-owned or restricted trust lands is to prepare them for successful living. In Federal schools children develop basic academic skills, acquire an understanding of the social and economic world which surrounds them, learn improved standards of living, follow practices which assure optimum health, acquire the necessary vocational training to qualify for gainful employment, and obtain sufficient education to enter special schools and institutions of higher learning. The system of schools provided by the Federal Government for Indian children meets program

standards required by the States in which they operate, and all but one of the secondary schools are accredited. Plant facilities at the school lacking accreditation have not yet been brought up to required standards.) A full 4-year high school course is offered at 26 schools. Seven other schools offered high school training at less than the 4-year course.

Indian children are entitled to the same opportunities for public school education as are provided for other citizens living within a State. It is encouraging to note that the States have assumed responsibility for the education of 130,885 (63.3 percent) school-age Indian children in the States where the Bureau of Indian Affairs has direct educational responsibility. Over one-third are educated at no cost to the Bureau of Indian Affairs. In some States, however, tax-exempt, Indian-owned lands and large numbers of Indian children within a school district may create financial burdens for which local funds are inadequate. As early as 1890, contracts providing for financial assistance to schools attended by Indian children were negotiated with individual districts. It was recognized then, as today, that Indian children become better adjusted to living with all people in a community when they associate with other children in public schools. The Johnson-O'Malley Act, which became law in 1934, authorized the Secretary of the Interior to enter into contracts with States for the education of Indians and to permit the use of Federal school buildings and equipment by local school authorities. Consequently, some States with large Indian populations now have no Federal schools within their boundaries.

Under the terms of Public Law 874, 81st Cong. (64 Stat. 1100), as amended August 13, 1958, administered by the Department of Health, Education, and Welfare, a new Federal aid resource was made available to eligible school districts educating Indian children. This aid is available to meet partial costs of normal school operation. Additional supplemental aid for the education of Indian children under the Johnson-O'Malley program is limited to districts that do not qualify under the Public Law 874 program and to districts meeting educational problems under extraordinary circumstances, including special services and special programs designed to facilitate the education of Indian children.

In fiscal year 1971, the Bureau of Indian Affairs, entered into contracts with 13 States, with school districts

in 6 other States, and with 2 consolidated tribal groups in 2 other States, all in accordance with approved plans which specify conditions under which financial aid is extended. In addition to these, aid was provided through contracts for the education in public schools of 4,195 out-of-district Indian children living in dormitories operated by the Bureau of Indian Affairs in 7 towns adjacent to the Navajo Reservation, and in Albuquerque, New Mexico.

In summary, then, the Bureau of Indian Affairs had direct responsibility for the 56,786 children enrolled in Federal schools and housed in Federal dormitories, and partial financial responsibility for approximately two-thirds of those enrolled in public schools.

Statistics concerning Indian education are published annually by the Bureau of Indian Affairs and are available the fall following the close of the school term which they cover.

Congressional appropriations to the Bureau of Indian Affairs are limited to the education of children of one-fourth or more degree of Indian blood and native children in Alaska, except for the Cherokee Agency where children of less than one-quarter degree of Indian blood enrolled in the tribe may attend Federal schools. Native children in Alaska are Indian, Eskimo, and Aleut. The 14 tables below relate to Indians and native children, as defined above, and to their schools.

Table 1 shows the enumeration of all Indian children from 5 to 18 years, inclusive, and those over 18 who are enrolled in school by area, agency, and school status.

For Indian children who are enrolled in public schools and are no longer a Federal education responsibility, the Bureau must rely on the public school systems to provide census information. Indian mobility accounts for the children, 5 to 18 years inclusive, who are shown under the caption "Information Not Available."

Five-year olds have been included with the school age population since fiscal year 1969 when kindergarten classes were added in some schools operated by the Bureau of Indian Affairs.

It should be noted that children over 18 are not included in the enumeration of school-age population. Table 1 is based on the annual school census of Indian children 5 to 18 years old, while tables 2 through 11 are derived from annual attendance reports of individual schools operated by the Bureau of Indian Affairs and covers all students enrolled regardless of their ages.

Table 2 indicates enrollment and average daily attendance in Federal schools by type of school and area. Average daily attendance for all schools, exclusive of hospital schools, was 82.0 percent in 1971 as compared to 83.0 percent in 1970. Table 3 indicates numbers of schools by area.

The following changes account for a net decrease of 15 in the number of facilities operated in fiscal year 1971.

<u>Area</u>	<u>Type</u>	<u>Opened</u>	<u>Closed</u>	<u>Transferred to Public School</u>
Aberdeen	Day Schools		2	
Juneau	Day Schools			14
Navajo	Day Schools	1		
<b>TOTALS</b>		<b>1</b>	<b>2</b>	<b>14</b>

In fiscal year 1971 the Bureau of Indian Affairs operated kindergarten classes in 83 schools (33 boarding schools and 50 day schools) with an enrollment of 2,344 children. All Kindergarten pupils attend school on a day basis. The kindergarten enrollment represented 4.5 percent of the total enrollment.

Tables 4, 5, 6 and 7 list individual schools, instructional units in hospitals, and dormitories operated by the Bureau of Indian Affairs, mailing address, enrollment, average daily attendance, and grades taught. The Albuquerque Dormitory is operated in conjunction with the Albuquerque Indian School but is shown with peripheral dormitories because these dormitory students attend public schools under conditions identical to other peripheral dormitories.

Table 8 indicates grade level. In 1971 enrollment in the beginners and first 4 grades decreased by 708 pupils to 21,596 as compared to the previous year's 22,304. This group represents 41.1 percent of the entire student body. An enrollment of 1,916 ungraded elementary and secondary students account for 3.6 percent of total enrollment.

In line with the Bureau's policy of encouraging public school enrollment of Indian children, many students transfer to public schools when they reach the sixth grade and have acquired some facility in the use of the English language. This is a factor in the seemingly low numbers of graduates of Federal high schools. In fiscal year 1971, 2,090 high school students graduated, a increase of 151 students from 1970.

Table 9 indicates the number of high school graduates, number of 8th grade completions, and number of Post High completions.

Table 10 indicates students according to their degree of Indian blood. Full bloods comprise 78.4 percent of the total and only 4.8 percent are less than one-half Indian.

Table 11 shows tribal designation of students in Federal schools. One hundred and thirty-two specific tribes or tribal groups and Aleuts, Eskimos, and the various tribes of Indians in Alaska were represented in 1971.

94 tribes had fewer than 39 members each and these are grouped together as "All Other Tribes." Aleuts, Eskimos, Navajos, Sioux, Chippewas, and Pueblos (including Hopi, shown separately) are the most numerous and together comprise 79.7 percent of the total enrollment.

Table 12 indicates the completed school construction, both new and replacement, during fiscal year 1971.

In fiscal year 1971, the Bureau of Indian Affairs participated for the fifth year in the Elementary and Secondary Education Act. Table 13 indicates the extent of the activities carried out under Titles I, II, III, VI-A and VII of the program.

Table 14 shows the number of participants in the summer program, by category, for fiscal year 1960 through 1971.
